# HTML Cheat Sheet

## Basic Structure of HTML Document

```
<!DOCTYPE html>  
<html lang="en">  
<head>...</head>  
<body>...</body>  
</html>
```

### **<html>...</html>**

Its represent the root of an HTML document. So its also refers as the root element. All other element must written inside the <html>...</html>

### **<head>..</head>**

The HTML element contains machine-readable information (metadata) about the document, like its title, scripts, and style sheets.

## **<meta>**

The <meta> tag defines metadata about an HTML document. Metadata is data (information) about data. <meta> tags always go inside the <head> element.

## **<title>...</title>**

The HTML Title element (<title>) defines the document's title that is shown in a browser's title bar or a page's tab.

## **<style>...</style>**

The HTML <style> element contains style information for a document, or part of a document.

## **<body>...</body>**

The HTML Element represents the content of an HTML document. There can be only one element in a document.

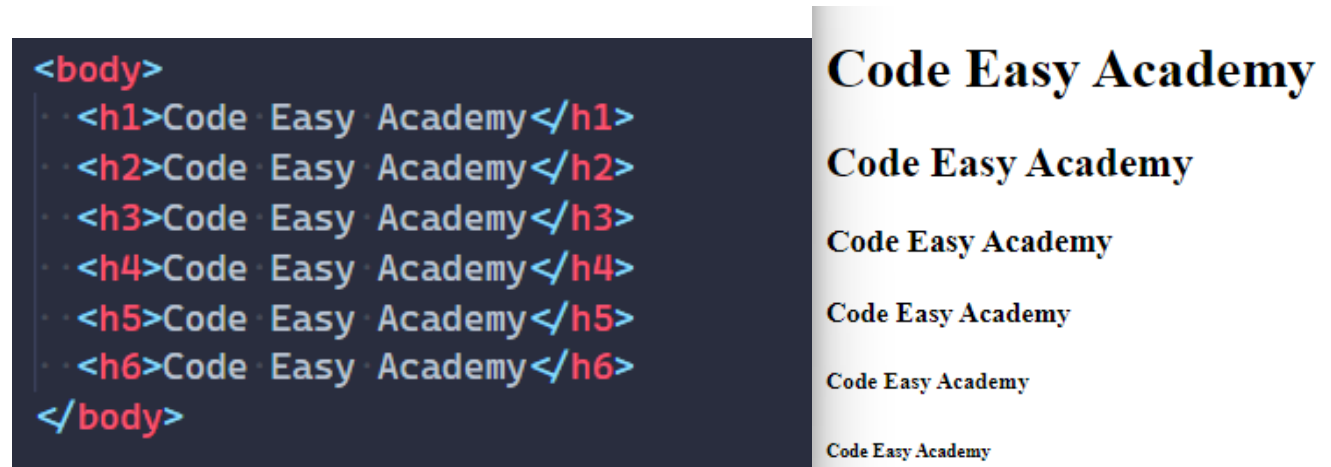

## **<!-- -->**

Defines a Comment in HTML.

## **<h1> to <h6>**

The HTML <h1> to <h6> element represent six levels of section heading. <h1> is the highest section level and <h6> is the lowest.

Example:

## **<div>...</div>**

The HTML Content Division element (<div>) is the generic container for flow content. It has no effect on the content or layout until styled using CSS.

## **<hr>**

It represents a thematic break between paragraph-level elements: for example, a change of scene in a story, or a shift of topic within a section.

## **<ul>**

It represents an unordered list of items, typically rendered as a bulleted list.

## **<li>**

It is used to represent an item in a list.

**<ol>**

Its represents an ordered list of items, typically rendered as a numbered list.

**<p> .. </p>**

Its represents the paragraph

**<img>**

Its use to embeds an image into the document

**<table>..</table>**

Its represents tabular data — that is, information presented in a two-dimensional table comprised of rows and columns of cells containing data.

**<tbody>..</tbody>**

Its represents tabular data — that is, information presented in a two-dimensional table comprised of rows and columns of cells containing data.

**<thead>..</thead>**

Its defines a set of rows defining the head of the columns of the table.

## `<td>..</td>`

Its defines a cell of a table that contains data. It participates in the table model.

## `<tr>..</tr>`

Its defines a a row of cells in a table.

## `<th>..</th>`

Its defines a cell as header of a group of table cells. The exact nature of this group is defined by the scope and headers attributes.

### Example

```
<table>
  <thead>
    <tr>
      <th colspan="2">Hind Tech Tutorials</th>
    </tr>
  </thead>
  <tbody>
    <tr>
      <td>Code easy Academy</td>
      <td>Subscribe</td>
    </tr>
  </tbody>
</table>
```

## **<button>..</button>**

Its represents a clickable button, which can be used in forms or anywhere in a document that needs simple, standard button functionality.

## **<form>...</form>**

Its represents represents a document section that contains interactive controls for submitting information to a web server.

## **<input>**

The HTML element is used to create interactive controls for web-based forms in order to accept data from the user; a wide variety of types of input data and control widgets are available, depending on the device and user agent.

## **<label>...</label>**

Its represents a caption for an item in a user interface.

## **<option>..</option>**

Its is used to define an item contained in a , an , or a element. As such, can represent menu items in popups and other lists of items in an HTML document.

**<select>..</select>**

Its represents a control that provides a menu of options.

**<textarea>..</textarea>**

Its represents a multi-line plain-text editing control, useful when you want to allow users to enter a sizeable amount of free-form text, for example a comment on a review or feedback form.

# CSS Cheat Sheet

## Background

**background-image:** url() | none

**background-position:** top left | top center | top right | center left | center center | center right | bottom left | bottom center | bottom right;

**background-size:** auto | cover | contain;

**background-repeat:** repeat | repeat-x | repeat-y | no-repeat;

**background-attachment:** scroll(default) | fixed;

**background-origin:** border-box | padding-box | content-box;

**background-color:** color | transparent;

**background-clip :** border-box|padding-box|content-box|no-clip;

## Border

**border-width :**length;

**border-style :**none | hidden | dotted | dashed | solid | double | groove | ridge | inset | outset;

**border-color:** color

## Border-radius

**border-radius :** length;

border-top-right-radius, border-bottom-right-radius.

border-bottom-left-radius. border-top-left-radius;

**box-shadow:** inset || [ length, length, length, length | color ] none;

## Box Model

**float:** left | right | none ;

### height

**height:** auto| length| %;

**max-height:** auto| length| %;

**min-height:** auto| length| %;

### width

**width:** auto| length| %;

**max-width:** auto| length| %;

**min-width:** auto| length| %;

### margin

**margin-top:** auto| length| %;

**margin-bottom:** auto| length| %;

**margin-left:** auto| length| %;

**margin-right:** auto| length| %;

### Padding

**padding-top:** auto| length| %;

**padding-bottom:** auto| length| %;

**padding-left:** auto| length| %;

**padding-right:** auto| length| %;

## Display

**display:** none | inline | block | inline-block | flex | inline-flex | grid;

## Overflow

**overflow:** visible | hidden | scroll | auto | no-display | no-content;

**overflow-x:** visible | hidden | scroll | auto | no-display |  
no-content;

**overflow-y:** visible | hidden | scroll | auto | no-display |  
no-content;

## Visibility of Element

**visibility :** visible | hidden | collapse;

## Clear Property

**clear:** left| right | both | none;

## Font

**font-family :**serif | sans-serif | Font Name;

**Font-style :**normal | italic | oblique | inherit ;

**font-variant:** normal | small-caps | inherit;

**font-size:**xx-small | x-small | small | medium | large | x-large |  
xxlarge | smaller | larger | inherit | length | %;

**font-weight:** normal | bold | bolder | lighter | 100 | 200 | 300 | 400 | 500 | 600 | 700 | 800 | 900 | inherit;

## Text Decoration

**text-decoration:** none | underline | overline | line-through | blink;

## Word Spacing

**word-spacing:** Normal | length |% ;

## Color

**color:** inherit | color;

## opacity

**opacity:** inherit| number

## List

list-style

**list-style-position:** inside | outside;

**list-style-image:** none | url;

**list-style-type:** none | asterisks | box | check | circle | diamond | disc | hyphen | square | decimal;

## Outline

**outline-color:** color | invert;

**outline-offset:** length | inherit;

**outline-style:** none | dotted | dashed | solid | double | groove | ridge | inset | outset;

**outline-width:** thin | medium | thick | length;

## Positioning

**position:** static | relative | absolute | fixed;

**top:** auto | % | length;

**bottom:** auto | % | length;

**left:** auto | % | length;

**right:** auto | % | length;

## Z-index

**z-index:** auto | number;

## Animations

**animation-name :**none | IDENT ;

**animation-duration:** time ;

**animation-timing-function:** ease | linear | ease-in | easeout | ease-in-out | cubic-Bezier (number, number, number, number);

**animation-delay :**time;

**animation-iteration-count:** Inherit | number;

**animation-direction:** normal | alternate;

**animation-play-state:** running | paused;

## Transitions

**transitions-delay** :time;

**transitions-duration** :time;

**transitions-property**: none | all transition-timing-function ease | linear | ease-in | ease-out | ease-in-out | cubicBezier( number, number, number, number);

## **Pseudo-class**

**:active**

an activated element

**:focus**

an element while the element has focus

**:visited**

a visited link

**:hover**

an element when you mouse over it

**:disabled**

an element while the element is disabled

**:enabled**

an element while the element is enabled

**:checked**

an element (form element control) that is checked

**:selection**

an element that is currently selected or highlighted by the user

**:enabled**

an element while the element is enabled

**:first-child**

an element that is the first sibling

**:last-child**

an element that is the last sibling

**:nth-child(n)**

an element that is the n-th sibling

**:root**

root element within the document

## **Pseudo-element**

**:before**

Inserts some content before an element

**:after**

Inserts some content after an element

**:first-letter**

Adds special style to the first letter of a text

**:first-line**

Adds special style to the first line of a text

## **Selector Types**

**Universal (\*)**

Any element

**Type (h1{})**

Any element of that type

**Grouping(h1,h2,h3{})**

## Multiple elements of different types

**class(.demo{})**

Multiple elements of different types when you don't want to affect all instances of that type

**id(#demo{})**

A single element type when you don't want to affect all instances of that type.

**Descendant(#demo .text{})**

An element that is below (in the document tree) another element—no matter how many levels below

**child (#demo > .text{})**

An element that is directly below (in the document tree) another element.

**Adjacent Sibling (#demo + h1{})**

All elements that share the same parent and elements are in the same immediate sequence
